

ABOUT JIMINY PEAK

Green Jiminy

The Jiminy Peak Resort Management and Employees are committed to being responsible stewards of Massachusetts' natural resources. Massachusetts' beauty and health are an integral part of our business. We live here so working to maintain it comes naturally.

Jiminy's policy of environmental awareness is seen in all of our activities. We seek to raise the environmental awareness of guests and employees, and to broaden their knowledge and appreciation through educational programs along with our active and passive use of the land for year-round recreation.

Our development and maintenance programs are guided by principles of land and energy conservation, by forest and wildlife habitat preservation and by maintaining Massachusetts' water quality and aesthetic beauty.

In 2008 Jiminy Peak was awarded the **Golden Eagle Award** by Clif Bar and the National Ski Areas Association Overall Environmental Excellence for the construction of Zephyr.

Jiminy Peak strongly believes in preserving the Earth for future generations. We are showing our commitment by being the first Mountain Resort in North America to install a wind turbine in order to generate clean, natural energy. Together we can shape a sustainable community for the future.
